

With the ComEd Energy Efficiency Program, you can save money for what matters most. You work hard every day—let energy efficiency lessen the load.

Agricultural Energy Savings

Help your farm or agribusiness save money and energy today with our Agricultural offering. We offer incentives specifically designed for energy-related agricultural activities, such as crop, dairy and livestock farming and on-site processing. We also offer incentives for agricultural facilities including greenhouses and indoor facilities.

HOW WE CAN HELP

The biggest challenge to reducing energy use in your farm or agribusiness is knowing where to start. Our agriculture-focused Energy Efficiency Service Provider will perform a **FREE** facility assessment to identify energy efficiency opportunities and help you with every step of the process.

Energy efficiency incentives are available for equipment and system upgrades for both existing and new construction facilities. Our team can help you identify incentives, as well as suggest additional funding sources that can help your farm or agribusiness implement energy savings.

Watch Your Savings Grow

Like a good harvest, energy efficiency provides great results with time. Good thing the ComEd Energy Efficiency Program makes it easy to rake in savings year after year.

RETROFIT YOUR LIGHTING AND SAVE

High-efficiency lighting reduces energy use and provides more uniform light across your facility. In addition to saving you money through increased efficiency, LEDs may last more than 25,000 hours and instantly turn on to full brightness at low temperatures.*

INSTALL VARIABLE SPEED DRIVES (VSDs)

Motor-driven equipment like fans and pumps operate more efficiently at partial load with variable speeds instead of operating at full speed at all times. VSDs vary the rate of speed at which pumps and fans operate, based on system requirements matching energy use to actual demand, which means you only use what you need.

FAN UPGRADES

Use incentives from the ComEd Energy Efficiency Program to update your high speed exhaust, ventilation and circulation fans, in varying sizes. Replace your existing fans with high-efficiency, high-speed fans.

SITE-SPECIFIC INCENTIVES

Site-specific incentives are available for a number of projects, including LED grow lights, dairy refrigeration heat recovery, dairy heat plate exchangers, low-energy livestock waterers, new construction and more. Our team is ready to help with your needs.

CONTACT US

The ComEd Energy Efficiency Program offers incentives, technical services and whole-building solutions to help facilities use energy more efficiently. For more information visit **ComEd.com/Agriculture**, email us at **BusinessEE@ComEd.com** or call **855-433-2700**.
